

Municipality of Chatham-Kent Electronics Collection

Who's Involved & Why

Ontario Electronic Stewardship (OES), a non-profit industry organization, oversees the responsible reuse and safe recycling of waste electronics through its network of more than 600 approved collection sites across the province. The program was developed in co-operation with Waste Diversion Ontario under the Waste Diversion Act, 2002.

What is the Program all about?

The program increases opportunities for Ontarians to safely and responsibly recycle old, unwanted electronics and keep them out of the landfill through its network of more than 600 OES approved collection points across Ontario. Here people can drop off designated electronic equipment and be assured that it be reused or recycled in an environmentally responsible way.

Why Bother?

Unwanted electronics should not end up in the landfills. Most of the parts – steel, glass, copper, aluminum, plastics and precious metals can be recovered and made into new products. Also lost of electronic equipment like computers, printers and televisions can be reused, further cutting down on waste.

The goal of the OES program is to keep more of these electronics from ending up in the landfills and to encourage more responsible reuse and safe recycling opportunities.

Where Can I Take My Waste Electronics?

Waste electronics can be delivered to any Municipal Transfer Station. Please see individual transfer station for hours of operation, location, etc.

What is Accepted?

Computer Accessories

CD-Rom Drives

Computer Keyboards

Computer Mouse

DVD Drives

External Hard Drive

Floppy-Disk Drives

HD-DVD Drives

Modems (wired and wireless)

Computers
